

ESD coating LICRON CRYSTAL, liquid, transparent, 3.78 liters

Versatile, crystal clear urethane coating that adheres to metal, plastic and most other surfaces. Ideal for converting standard bumpers, containers, tools and surfaces into ESD-safe material, saving expensive replacement costs. The end result complies with ANSI/ESDS20.20, which prevents static damage to sensitive electronic components.

- Robust conductive coating
- Surface resistance from 10^6 to 10^9 ohms
- Operating temperature range up to 302°F (155°C)
- Independent of humidity
- Excellent adhesion to a wide variety of surfaces: Glass, plastic, etc.
- Yield: 1 canister at 1 ml wet film covers approx. 150 m², at 2 ml approx. 70 m²
- Non-ozone depleting

item number

WL33965

Products for the electronic industry

model	1756-G
manufacturer	TECHSPRAY
manufacturer item number	1756-G
order unit	1 jerrycan
content unit	3.78 l
typical bleeder resistance	10^6 bis 10^9 Ohm
ESD safe	yes
