ESD professional shoes air cushion, lace-up shoe black, size 42

The "air cushion" ESD occupational shoe from ABEBA is designed for use in work areas where reliable ESD protection is required in addition to comfort. It meets the requirements of DIN EN 61340 and EN ISO 20347:2012 (O2, SRA) and is therefore suitable for professional applications without a protective toe cap.

The grained leather upper offers a robust yet flexible structure that adapts well to the foot. Inside, a breathable lining with Silver Point ensures effective moisture regulation and supports a comfortable foot climate - even when worn for long periods.

The slip-resistant PU outsole ensures a secure grip on different surfaces, while the removable insole offers additional comfort and can be easily replaced if necessary. The classic lacing in the instep area allows for individual adjustment and ensures a secure fit.

The Sanitized treatment supports hygienic conditions in the shoe. Manufactured in a standard width of 10, the low shoe is a reliable solution for everyday use in industry, service or electrostatically sensitive areas.
• CE, EN ISO 20347:2012, O2, SRA
• Sanitized treated
• ESD-compliant according to DIN EN 61340

Item no.	WL34562
Model	32650-42
