

ESD shirt, white plaid

Our ESD shirt is designed for use in electrostatically sensitive work areas and reliably protects components from electrostatic discharge. Made from a material mix of 62% polyester and 34% cotton, it combines comfort with long-lasting durability.

The long-sleeved design offers additional protection for the arms and supports compliance with ESD protection measures in production, laboratory or service environments. The shirt in a white checked design is both functional and visually appealing and can be easily integrated into existing workwear.

Thanks to its ESD-compliant design, it is ideal for all activities where electrostatic charging must be avoided, such as assembly, rework, inspection or laboratory work in the electronics industry.

Item no.

WL35312

Products for the electronic industry

Manufacturer	WEIDINGER
GPSR manufacturer data	Weidinger GmbH Hertha-Sponer-Str. 1a DE-82216 Gernlinden www.weidinger.eu
