

ESD High Ohm Meter Measuring Kit Metriso B530, digital

The Metriso Measuring Kit from Warmbier is a digital high impedance meter used to measure point-to-point resistances and to check the leakage resistances of persons, shoes, mats and floor systems in an ESD area.

- Suitable for measuring point-to-point resistances and leakage resistances
- complete with accessories, ESD case
- battery operation
- Measuring voltage/measuring current: Ohms range: $1\text{ mA} < I < 1.3\text{ mA}$; High impedance range: DC voltage 10 V, 100 V and 500 V
- Measuring range: Low resistance range: 0 to 10 kOhm; High resistance range: 1 kOhm to 199 GOhm
- 2x model 870 (weight 2,27 kg / \varnothing 63,5 mm) with conductive contact rubber (grey) with silver particles and extension bar
- 1x hand electrode model 45
- corresponds to DIN EN 61340-4-1, DIN EN 61340-2-3, DIN EN 61340-4-5
- Dimensions L x W x H: 140 x 225 x 130 mm

item number	WL35560
model	METRISO-B530
manufacturer	WARMBIER
manufacturer item number	7100.B530.MK
scope of supply	digital high impedance meter Metriso B530 2 Model 870 Measuring Electrodes with one Extension Rod 1 hand electrode test leads Operating instructions (German, English, French) works calibration certificate conductive carrying case with dissipative pink foam
order unit	1 piece
content unit	1 piece
standards	IEC 61340-4-5
digital display	yes
display	analog and digital measured value display, as bar graph or pointer
range	Low resistance range: 1 to 10 kOhm High impedance range: 1 kOhm to 199 GOhm
internal memory	no
ESD safe	yes
