

ESD spatula

The Warmbier ESD spatula is an indispensable tool for precise and effective adhesive removal in electronics production. Made of electrostatically conductive plastic and measuring 250 x 75 mm (L x W), this spatula offers the highest quality and reliability. The ESD symbol guarantees additional safety for sensitive electronic components. Easily remove adhesive residues and other residues without the risk of electrostatic discharge.

item number	WL35870
model	6105.SP.75
manufacturer	WARMBIER
manufacturer item number	6105.SP.75
length	245 mm
width	75 mm

Products for the electronic industry

height	18 mm
