

## Soldering tip PHT series, chisel-shaped fine, curved 30°, 1.5 x 12 mm

The PHT-650326 soldering tip from OKI's PHT series is designed for precise soldering work on temperature-sensitive components. The chisel-shaped tip is angled at 30° and measures 1.5 x 12 mm, making it particularly suitable for hard-to-reach soldering points and fine components.

Thanks to the careful workmanship, the tip offers consistent heat conduction and precise control during every soldering process. It is compatible with the PS-900 and PS-CA1 handpieces and can be easily replaced to quickly restore the soldering station's readiness for use.

The PHT-650326 is ideal for electronics repairs, prototyping and production work where precise work and gentle use of temperature are crucial. Users benefit from a durable, reliable tip that guarantees maximum precision in sensitive soldering applications.

- for temperature sensitive applications

Item no.	<b>WL36527</b>
Model	PHT-650326
Manufacturer	OKI
Manufacturer article no.	PHT-650326
GPSR manufacturer data	OK International Ltd Eagle Close, Chandlers Ford GB-SO53 4NF Hampshire www.ok-international.com
Sales unit	1 piece
Content unit	1 piece

Incl. battery	no
Product series	PHT Series
Tip series	PHT
Angle (soldering tip)	30 °
Tip length	12 mm
Tip width	1.5 mm
Tip shape	chisel-shaped
Tip alignment	bent
Matching handpiece	PS-900, PS-CA1
ESD compliant	no
