Polyester swab, 5.9 mm

The polyester swab 52121 from COVENTRY is designed for high-precision cleaning tasks in particularly sensitive environments. With a diameter of 5.9 mm and a stable, rigid head, it enables controlled and even cleaning even in demanding applications.

The pillow-tip tip ensures a high absorption capacity of particles and liquids, making the swab ideal for cleaning sensitive surfaces and components. The glass-filled nylon handle provides additional stability and ensures safe handling.

Thanks to its suitability for class ISO 3 to 4 cleanrooms (class 1-100), this swab meets the highest requirements for cleanliness and process safety. It is supplied in packaging units of 25 pieces and is therefore ideal for targeted use in laboratories, microelectronics and precision manufacturing.

Item no.	**WL36651**
Model	52121
Manufacturer	COVENTRY
Manufacturer article no.	52121
GPSR manufacturer data	Chemtronics, ITW Contamination Control Electronics Saffierlaan 5 NL-2132 Hoofddorp www.chemtronics.com
Sales unit	1 PU
Content unit	25 piece
Diameter	5.9 mm
ESD compliant	no
