Dosing needles and suction cup set, gauge 14/18/21, pointed shape made of {{D}}

Nordson EFD's Model 7016105 Dispensing Needle and Suction Cup Set is designed for precise dispensing and positioning of fluids in manufacturing and laboratory applications. The set includes 14, 18 and 21 gauge needles and cups with diameters ranging from 0.0938" to 0.3750", providing flexibility to meet different application requirements.

The needles are designed for controlled and accurate material dispensing, while the suction cups support secure placement of components or materials. This set is ideal for applications such as encapsulation, adhesive application or precise dispensing in electronics manufacturing, laboratory or industrial assembly where accuracy and repeatability are critical.

Item no.	**WL37298**

Model	7016105
Manufacturer	NORDSON EFD
Manufacturer article no.	7016105
GPSR manufacturer data	Nordson Deutschland GmbH Kapellenstraße 12 DE-85622 Feldkirchen www.nordson.com
Scope of delivery	2x 14, 1x 18 and 2x 21 gauge vacuum needles and 1 suction cup each with 0.0938", 0.1250", 0.1875", 0.2500" and 0.3750" diameter
