The K75DS061 soldering tip from the K soldering tip series from THERMALTRONICS is ideal for precise soldering on medium to large solder joints. With its knife-shaped tip of 4.50 mm width and an enlarged tin area of 6.1 mm, it enables fast heat transfer and a uniform soldering pattern - especially for flat components or vias.

The tip is RoHS-compliant and lead-free, making it ideal for modern production processes. It fits on the SHP-K and SHP-KM handpieces and can be used in the TMT-2000S-K, TMT-2000PS, PS900 w/SHP-K and MFR-PS1100/MFR-PS2200 w/SHP-KM soldering stations.

Thanks to the straight alignment of the soldering tip, precise soldering can be achieved, while the robust design ensures a long service life. With a tip length of 16.65 mm and a weight of just 15 g, it is easy to handle and ensures ergonomic working over long periods of time.

This high-quality tool from the K series combines precise soldering control, efficient heat transfer and compatible versatility - an indispensable accessory for professional electronics engineers and service technicians.
