Soldering tip chisel extra large 5,0mm (0,20")

he S75CH050 chisel soldering tip extra large 5.0 mm from the S soldering tip series from THERMALTRONICS is ideal for the fast and efficient application of solder to wide solder joints. Its straight, chisel-shaped tip allows solder to be distributed evenly, ensuring a clean soldering pattern and optimum heat transfer to the solder joint.

The tip is RoHS-compliant and manufactured lead-free, making it both environmentally friendly and safe for professional use. With a tip length of 14 mm and a tip width of 5 mm, it offers a generous contact surface that makes it easier to work on large soldering surfaces without endangering neighboring components.

The soldering tip is compatible with the SHP-SM handpieces and is suitable for TMT-2000PS, SP200, MFR-PS1100 and MFR-PS2200 supply units. Thanks to the combination of the S series and the extra-wide design, electronics engineers can process large solder joints efficiently and in a controlled manner.

The chisel-shaped extra large soldering tip 5.0 mm S75CH050 from THERMALTRONICS is the perfect choice for electronics engineers who want to process wide soldering surfaces quickly, precisely and reliably - for professional results every time.
