Desoldering tip D-Inside 0.80mm (0.03")

The T80DT003 D-inner 0.80 mm desoldering tip from the T desoldering tip series from THERMALTRONICS is ideal for precise removal of solder from fine components and hard-to-reach solder joints. Thanks to its straight, conical shape, solder can be picked up precisely, enabling clean and controlled desoldering even on delicate components.

The tip is RoHS-compliant and lead-free, making it both environmentally friendly and safe for professional use. With a tip length of 13 mm and a tip width of 0.80 mm, it offers the optimum contact surface to capture solder efficiently without endangering adjacent components.

The desoldering tip is compatible with the DS-GUN-2 handpiece and is suitable for the TMT-5000S-1 and TMT-5000S-2 soldering stations. Thanks to the T-series and the fine conical design, electronics technicians can carry out even demanding desoldering work precisely and efficiently.

The 0.80 mm T80DT003 D-inside desoldering tip from THERMALTRONICS is the perfect solution for electronics engineers who want to ensure controlled, clean and reliable desoldering of delicate components.
- For: TMT-5000S-1, TMT-5000S-2
- Soldering tip series T
- RoHS compliant / lead-free
- tip type: desoldering
