

Measurement App (incl. calibration sheets suitable for lens +2, +3, +4, +5, +10 (1x Plan))

Measurement app from TAGARNO allows you to check the size of a product or defect directly on the TAGARNO TREND or PRESTIGE microscopes. Instead of doing the measurement manually, let the app do it for you. With the calibrated app, you can measure length, diameter, angle, area and more. Afterwards, add text boxes and arrows to highlight an area of the product. Then, save and forward your photo to colleagues, customers or suppliers to discuss your findings. The application is installed directly on the microscope with no need for an external computer. You do, however, need a mouse and keyboard required to use this application. Calibration cards are included when purchasing the app.

- Point-to-point measurement
- Distance to line measurement
- Polyline measurement
- Diameter measurement
- Radius measurement
- Angle measurement
- Area measurement

- Text Annotation
- Arrow Annotation
- Change color and size of text and annotations
- Choose measurement units (millimeter or inches)
- Save photos with or without your measurement
