

## Electric field meter EFM 51, with conductive case

### Description

Handy, mobile electric field meter with digital display for measuring electrostatic fields and electrostatic charges. In distance mode, the measured field strength (V/m) is automatically converted into the surface potential (V) over the set measuring distance. In the additional Field Strength mode, the actual field strength (V/m) is displayed.

- Type of measurement: Influence principle (field mill principle)
- Measuring range: 0 to  $\pm 160$  kV (distance mode) 0 - 800 kV/m (field strength mode)
- Display: 2-line LCD display
- Operating mode: Battery operation

### Product details

item number	WL39977
manufacturer	WARMBIER
manufacturer item number	7100.EFM51.PLUS
model	7100.EFM51.PLUS
scope of supply	conductive case

Products for the electronic industry

grounding wire  
incl. works calibration certificate  
Operating Instructions (German/English)

order unit	piece
digital display	yes
range	0 to $\pm 160$ kV (distance mode) 0 - 800 kV/m (field strength mode)
display	LCD display (2 lines)
