

ESD safety shoes for lacing, ladies, black/pink, size 42

The ESD shoes from Puma Safety are characterized by high flexibility and noticeably light construction. This is achieved by the natural Flexmotion sole architecture. It combines the "Natural Running" concept with state-of-the-art safety shoe technology. The upper of the S1P safety shoe with ESD properties has been manufactured using FUSE.TEC® technology. Reinforcing elements are seamlessly welded onto the textile base material, which means that no seams are required in heavily stressed areas such as flex zones.

- highly flexible, extremely damping and slip-resistant
- EN ISO 20345 S1P SRC
- suitable for insole supply (DGUV 112-191)
- ESD compliant

item number	WL41755
model	Fuse TC Pink Low
manufacturer	Puma Safety
manufacturer item number	644110234000042

length with packaging	350 mm
width with packaging	250 mm
