

Digital LED handheld magnifier for portable inspection, 4.3 "TFT LCD color display, 4x to 20x magnification

The digital hand magnifier is ideally suited for mobile testing and inspection, for documenting defects or checking immobile objects. Thanks to the high-resolution colour display, results can be viewed precisely on the monitor. The handling is very simple. The images are frozen at the touch of a button, stored in the internal memory if required and read out via USB for further processing. Simple key operation, fast image acquisition and uncomplicated downloading of images facilitate routine work. The main technical specifications are a magnification of 4x - 20x in 4 steps, a homogeneous adjustable LED illumination configured for close-ups and an integrated image memory that can store up to 20,000 images in JPEG format. The live image can be output to a monitor or TV via the HDMI output.

- Magnification up to 20x
- LED illumination
- Storage of up to 20,000 images
- Adjustable measuring lines
- USB port for flexible charging options
- Live view via HDMI output
- 2-piece safety lanyard
- Cleaning cloth & instruction manual

Item no.	WL42678
Model	CAM-BETA
Manufacturer	VISION
Manufacturer article no.	CMB002
