ProcessMate™ 5000 universal centrifuge for 3 - 30 cm^3 cartridges

Process Mate 5000 universal centrifuge
• Quickly and effectively removes air trapped in liquid materials that are packaged in cartridges
• The centrifugation of cartridges in advance of pneumatic or mechanical dispensing significantly improves process control and reduces waste
• With the speed regulator, the operator can adjust the acceleration force for low to high-viscosity liquids
• The electric brake, which allows the rotor to be stopped quickly at the end of the centrifugation process, allows additional time to be saved during the process
• Standard cartridge holders in the centrifuge are ideal for processing 30 cc cartridges
• Additional adapters also allow 3 cc, 5 cc and 10 cc cartridges to be securely held in place
Features:
• Adjustable RPM

- Fixed-angle rotor
- Electric brake
- Audible signal at the end
- Cover safety lock
- Class 1 desktop centrifuge
- Centrifuges 3 cc to 30 cc cartridges
- Switch-off function when the lid is opened
