

Service case "EPA" with 32 tools

- A conductive ESD tool case with an extensive equipment of ESD special tools.
- Ideal for electrostatically sensitive components and systems.

The case shells, tool boards and the variably subdivided bottom tray made of conductive material comply with DIN EN IEC Standard 10 00 15 Section 5. The tools have been successfully tested by several test laboratories in accordance with DIN EN 61340-5-1, 61340-2-1 and 61340-2-3 for work in ESD-protected areas. The robust case shells are pressed with a sturdy double aluminium frame.

On two boards, one of which can be equipped on both sides, 32 tools are stored in insertable compartments, ready to hand. The lid of the case contains a document compartment for storing written documents. The freely divisible tray in the bottom of the case allows additional tools and instruments to be stored. The case has 2 locks and a combination lock.
