

## ESD Verification Kit SRM 200, incl. case

The Warmbier ESD Verification Kit is used to verify ESD control elements such as conductive table coverings or EPA clothing etc. in an ESD area.

- With the additional "Mini Probe Adapter", Rpp measurements can also be measured on very similar surfaces as in cavities of deep-drawing trays.
- with carrying and conductive case

item number	WL43668
model	7100.SRM200.VK
manufacturer	WARMBIER
manufacturer item number	7100.SRM200.VK
scope of supply	1 SRM®200 with accessories 2 flat electrodes model 820 1 Mini Probe Model 410

	1 hand electrode model 45 2 test leads 1 conductive carrying case
order unit	1 piece
content unit	1 piece
digital display	yes
display	LCD display
internal memory	no
ESD safe	yes
