

Image Comparison app

The image comparison app is an intuitive microscope software app that allows you to create your own image library. In electronics quality control, and especially in outgoing inspection, comparing PCBs to images PCB samples is a great way to give a product the final GO or NO GO. Choose between previously saved images or save new photos as needed and add them to the image library. With this TAGARNO digital microscope application, each photo can be displayed in a variety of ways, including side-by-side or alternating at a user-defined interval. A mouse is required to use this application. Without XY stage.

- for FHD UNO, FHD TREND, FHD PRESTIGE
