

## Extraction unit Laserrauch AD Base 1 Oracle, with compressor, 230 V

---

A 2 in 1 solution that works with any voltage in the world and serves as a workstation by placing the laser engraver on the unit. The Advantage Base 1 Oracle is designed to fit numerous laser engravers from different manufacturers on the fume extractor, which effectively serves as a workstation. All Base units in the series feature an optional integrated compressor for compact installation. BOFA's "Easi-seal" filter attachment makes filter replacement simple, quick and safe. The revolutionary automatic voltage detection turbine automatically adjusts to operate at any voltage in the world, while counterflow filter technology improves filter performance and ensures longer filter life. Automatic flow control allows the user to preset the correct airflow, reducing noise pollution and protecting both the combined filter and the patented DeepPleat DUO prefilter.

- Automatic voltage detection (100 - 240 V) for worldwide use
- Automatic flow control
- DeepPleat-DUO pre-filter

- Advanced carbon filter technology
- Combined HEPA/gas filter
- Counterflow
- "Easi-seal" filter attachment
- Small footprint
- Low noise pollution
