

Soft-Thermal Insulator Grip HD Handle with 3m cable

This handle is supplied with 3 meters of cable.

This soldering handle is perfect for intensive soldering jobs requiring continued high thermal power such as large ground planes, production of solar panels, armor and other applications.

It features an extremely comfortable handle thanks to the soft-thermal insulation foam grip and the wider grip. It has a screw to fix the cartridge preventing its rotation.

It can provide up to 250W when used with a HD Heavy Duty Station and C470 Cartridge Range.

It can also work with Modular Control Units and CDS / CDB Stations using C245 Cartridge Range.
