

ESD sandals ARIZONA, 40, Birko-Flor, black, narrow

Due to the high wearing comfort and the anatomically shaped original cork-latex footbed, the two-belt sandal Arizona by BIRKENSTOCK is suitable for daily use at work. Thanks to its additional ESD equipment against spontaneous static discharges, the model is ideally suited for use in ESD areas.

The combination of the footbed with the specially developed sole guarantees a permanently soft discharge and protects sensitive components. All BIRKENSTOCK ESD models are tested according to the specifications of DIN EN 61340 and meet the requirements in the ESD range from 1.0×10^5 to 3.5×10^7 ohms.
