

## Voltage measuring head for EFM51

---

---

The voltage measuring head model 7100.EFM51.WT.MK.SET from Warmbier is designed for use with the EFM51 and enables safe voltage measurements up to 4 kV. The set is supplied with a yellow measuring guide to ensure quick and safe handling.

Thanks to its precise design, the measuring head guarantees exact measured values and is suitable for professional use in laboratories, test bays or in the production of electrical systems. It supports safe, efficient measurements on high-voltage and low-voltage systems and is a reliable tool for technicians and specialist personnel.

Item no.	WL46059
Model	7100.EFM51.WT.MK.SET
Manufacturer	WARMBIER
Manufacturer article no.	7100.EFM51.WT.MK.SET
