

Angle wrench set, metric, stainless steel 3950/9 Hex-Plus Multicolour Stainless 1

High-quality stainless steel offset wrench set for hexagon socket screws from Wera. Stainless steel prevents the transfer of extraneous rust. The Hex-Plus profile offers larger contact surfaces in the screw head. This reduces the notch effect to a minimum and virtually eliminates damage to the screw head. With hexagonal ball head on the long shank: The spherical output profiles allow the tool axis to be deflected or swiveled in relation to the screw axis, so that screws can be screwed "around corners". Take it easy tool finder with color coding according to size. In a virtually wear-free angle wrench clip.

- Solution to the extraneous rust problem: screw stainless steel to stainless steel!
- Hex-Plus makes hexagon socket screws last longer
- With "Take it easy" tool finder: Color coding according to size
- Wear-free clip material for increased service life
- Color-coded, easy-grip hose sheathing, even at low temperatures

Item no.	WL46263
Model	3950/9 Hex-Plus Multicolour Stainless 1
Manufacturer	WERA
Manufacturer article no.	05022669001
GPSR manufacturer data	WERA Werkzeuge GmbH Korzelter Strasse 21-25 DE-42349 Wuppertal-Cronenberg www.wera.de
Length	234 mm

Products for the electronic industry

Width	88 mm
Height	30 mm
