

Extraction unit AD Access - PC - 230V 50Hz, no VOC monitoring

A compact and affordable fume extraction system for light-duty laser marking, coding and engraving applications. The introduction of low-cost laser systems has led to the development of an entry-level fume extraction solution to maintain safe working conditions for the operator as well as product quality. AD-Access combines cost-effective operating costs with performance tailored to smaller laser applications. A three-stage filter condition indicator and three-stage filtration are included as standard: DeepPleat pre-filter, HEPA range and chemical range.

- Extraction unit AD Access - PC - 230V 50Hz
- with 2001 24V S/S and A2002 filter change / system error signal
- 512x320x310mm (HxWxD)

Item no.

WL46881
