

Automatic soldering iron for R245

- For automated process and standard soldering purposes.
- The soldering iron is controlled by the UCR245 Control Box and can be used in conjunction with the R245 Heavy Duty Cartridges with their precise positioning system.
- The TRA245 mechanism is actuated by compressed air, which enables quick and automatic cartridge change if the cartridges are worn out or if different cartridge geometries are used in the same soldering process.
- He works with the TR245 soldering iron.
