

CircuitWorks insulating pen, black,

The CircuitWorks® insulating pen is ideal for protecting and insulating traces, components and other sensitive electronic components. This highly effective acrylic conformal coating provides excellent protection against short circuits, moisture, abrasion, fungal attack and other environmental influences. Enables easy repair of solder masks in prototyping, PCB manufacturing and repair.

Features and benefits

- Easy to use one-component system
- Hard, durable coating
- High dielectric strength prevents electrical discharges
- Dries quickly at room temperature
- Protects against moisture and abrasion damage
- Meets the requirements of MIL-I-46058C and IPC-CC-830A
- Applications
- Insulates and protects conductive traces

Products for the electronic industry

- Repairs permanent solder masks
- Prevents short circuits and arcing

Item no.	WL47459
Manufacturer	CHEMTRONICS
Manufacturer article no.	CW3300BLACK
Sales unit	1 piece
Content unit	1 piece
Colour	black
Incl. battery	no
ESD compliant	no
