

Spare arm left for RHS-A

Discover the versatile replacement arm left for RHS-A from JBC, available at Weidinger.eu. This arm allows precise adjustment to different working positions to meet your individual requirements. The support point is strategically placed close to the work zone, which helps to stabilize the pulse rate. Thanks to its height adjustability, the arm offers complete freedom of movement so that you can work efficiently and comfortably. The replacement arm can also be easily coupled with the JT/TE support arm to optimally complement your workstation.

- allows you to adapt to different positions according to your work requirements
- Support point very close to the working zone, stabilization of the pulse frequency
- adjustable in height and allows complete freedom of movement
- can be coupled with the support arm JT/TE
