

Laser smoke suction system AD Universal, powder coated

A compact system designed specifically for small industrial environments and simple laser coding applications. The AD Universal fume extraction and filtration system is designed as a cost-effective solution for simple to average intensity applications. These compact systems are ideal for small industrial environments and simple laser coding applications.

- Digital speed control
- Filter status display
- Cost-effective replacement filters with long service life
- DeepPleat pre-filter
- Advanced Carbon Filter (ACF) technology
- Small footprint
- Low noise pollution

item number

WL47987

Products for the electronic industry

model	AD Universal
manufacturer	BOFA
order unit	1 piece
content unit	1 piece
field of extraction	laser fume
device series	AD Universal
ESD safe	no
