

App DXF overlay set (incl. built-in XY-Table and foot switch)

Description

DXF-Overlay is an intelligent digital microscope software that helps you find specific PCB components in seconds during electronics quality control. To optimize your efficiency and overall production capacity, this TAGARNO digital microscope application replaces otherwise tedious processes. Instead of manually trying to find a specific PCB component, simply type the component name into the app's search bar and the app will find it for you in seconds. To further improve efficiency, add post-processing instructions to the DXF file to avoid extra material at the workstation when post-processing batches of PCBs. This application requires the use of a mouse and keyboard. Tagarno's DXF overlay set includes the app, foot switch and XY table.

Product details

item number	WL48041
manufacturer	TAGARNO
manufacturer item number	307002
scope of supply	306009 303010 403005
order unit	set
ESD safe	no
