Extraction Print Pro Universal with HEPA14 filter

Fume extraction for the printing and print finishing industry.
BOFA's breakthrough fume extraction system, the PrintPRO Universal, was developed exclusively for the printing and print finishing industry. The unique features of the PrintPRO Universal allow it to capture a wide range of solvents generated in these environments, including MEK, ketones and fumes from UV applications.

The PrintPRO Universal is easily adaptable to a variety of environments, including wide format printers, inkjet coding (CIJ) printers (both solvent and UV), and numerous mailroom applications such as UV coating, hot melt binding, and mailwrap polywrapping.

- VOC (volatile organic compounds) gas sensor
- Automatic sensor voltage (100-240 V) for worldwide use
- Extended carbon life for low cost of ownership
- Specially treated carbon for safe containment of pressure vapors
- Low noise level
- Small footprint
- Compact size allows the exhaust to be positioned within the footprint of the printer
