

Suction AD-ORACLE iQ, stainless steel

The first choice and best-in-class solution with unique features in a compact device. The best-in-class, high-performance AD Oracle device has now been enhanced with the introduction of BOFA's new iQ operating system, which combines several unique features in one compact device. The iQ operating system operates on two distinct levels: The operator benefits from the ease of use and clarity of real-time information, and the system provides a cache of analytical data, allowing users to download performance and operational parameters for evaluation. The iQ system takes performance and safety parameters to a new level, ensuring that maintenance, downtime, and operating costs are kept to a minimum.

- Counterflow filtration technology
- Automatic flow control
- Automatic voltage detection (100 - 240 V) for worldwide use
- Advanced carbon filter technology
- Combined HEPA/gas filter
- High contrast display

Products for the electronic industry

- Real-time air flow display
- Independent monitoring of filter status
- Filter status alerts
- "Drain safe" operation

Item no.	WL48324
Model	L1974
Manufacturer	BOFA
Manufacturer article no.	1U630811022-1275
GPSR manufacturer data	BOFA International Ltd Balena Close 21-22 GB-BH17 7DX Poole www.bofa.co.uk
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
ESD compliant	no
