

Fiberglass cleaning pen for MU/LC

This instrument cleans the end faces of the ferrule from dust, oil and other contaminants without damaging or scratching the end face. The cleaning microfibres are tightly stranded and the residue-free extendable tip reaches recessed connections. When pressed, the tip, placed on the connector, rotates 180 degrees and performs a cleaning movement with an audible click sound.

- Applications for fiber optic network boards and assemblies, FTTX applications in outdoor areas, production facilities for cable assembly, test laboratories, servers, switches, routers and OADMS with LC/MU interface. Fiber optic ONE-CLICK cleaner specifically designed for use with SC, FC and SC connectors.

item number	WL48402
model	2-172
manufacturer	BERNSTEIN
manufacturer item number	2-172
scope of supply	Disposables with more than 800 cleanings per unit, detailed application description enclosed.
order unit	1 piece
content unit	1 piece
material	Made of antistatic resin
VDE	no
ESD safe	no
tool length	180 mm
