

Performus X15 Dosing unit, 0-1 bar (0-15 psi) Pressure regulator

The Performus X15 is equipped with a pressure regulator for 0-15 psi (0-1 bar), which provides better control when dispensing low viscosity materials.

The Performus X15 unit has a vacuum control, a practical teach function for easy setting of the initial shot size, an I/O connection and a universal mains connection.

- Teach-, time-controlled and continuous mode for operation
- Vacuum control prevents dripping of low viscosity
- Materials between cycles
- Digital time/pressure display
- Metal housing which also functions as a Faraday cage
- Constant dots, fillings and clean beads
- Spare part kits for easier on-site maintenance and servicing

The stronger physical protection provided by the metal housing makes the dispenser ideal for industrial environments and provides better EMI/RFI protection
