

Hygostar protective sleeves PE, detectable blue, 20my, 40cm, PU: 100 pieces

Detectable protective sleeve: With this protective sleeve you complete your detector assortment. In accordance with HACCP, the protective sleeve has a detector strip on the inside and can therefore be detected by the detector machine. This protective sleeve is made of PE and is therefore waterproof. The elastic band at both ends ensures an optimal hold. In large productions they are now standard: metal detectors. IFS and HACCP also prescribe them. Detectors detect foreign bodies at various points in food or pharmaceutical production. In this way you protect the end consumer and ensure quality and hygiene. On the other hand, they also protect the machines used from possible damage caused by foreign objects. A double benefit and reason enough to equip employees specifically with detectable protective equipment and working materials. with detector strips on the inside, is detected by the detector machine waterproof with elastic at both ends for best grip

- Polyethylene
- with fixed detector strip on the inside
- waterproof and durable
- at the ends with elastic band for best hold

item number	WL49459
model	Hygostar-28206
model line	Hygostar Detect
manufacturer	FRANZ MENSCH
manufacturer item number	28206
length	400 mm

Products for the electronic industry

order unit	1 PU
content unit	100 piece
colour manufacturer	blue
Colour	blue
film thickness	20my
material	polyethylene
features	durable
features clothing	elastic band
watertight	yes
