

## Hygostar overshoe PP/CPE, white/blue 16,5x40cm, anti-slip

This overshoe consists of a white polypropylene upper and a blue cast polyethylene outsole. The polypropylene upper is permeable to air. The CPE sole is very stable and tear-resistant. In addition, the sole has an extremely good grip and offers maximum protection against liquids as it is impermeable to moisture. These properties make this overshoe particularly suitable for use in the food industry and in hospitals.

- Overshoe
- white polypropylene fleece with blue CPE sole
- waterproof and tear-resistant underside, air-permeable upper part
- extremely grippy, rubberized sole
