

Hygostar beard protector PP, blue, 46x20cm, with elastic band

The beard protection is made of a polypropylene fleece. It is very air-permeable and light. It is also very comfortable to wear, as it has a latex-free elastic band and is hardly noticeable to the wearer. The beard protection is not only used by beard wearers, but everywhere where particularly high demands are made on hygiene, such as in hospitals, in biochemistry and in sensitive production.

item number	WL49576
model	Hygostar-29206
manufacturer	FRANZ MENSCH
manufacturer item number	29206
order unit	1 PU
content unit	100 piece

colour manufacturer	blue
