**Material info: LDPE refuse sacks**

The abbreviation LDPE stands for low density polyethylene. LDPE is therefore a form of polyethylene (PE). PE is very elastic and insensitive to acids, alkalis, alcohols, oils and water - an excellent material for bin liners or refuse sacks. Low density PE (LDPE) is much softer and more flexible, but also less resilient than high density PE (HDPE). Due to the higher strength properties, HDPE films can be produced up to approx. 5 my, LDPE films are usually not thinner than 12 my.

- Low Density Polyethylene Film
- firm quality, soft-elastic
- extremely tough and tear-resistant

item number

**WL49829**

Products for the electronic industry

model	HygoClean-32321
model line	Hygoclean Premium
manufacturer	FRANZ MENSCH
manufacturer item number	32321
length	1100 mm
width	700 mm
order unit	1 PU
content unit	25 piece
colour manufacturer	transparent
Colour	transparent
content in liter	120 l
material	Low Density Polyethylen (LDPE)
film thickness	45 my
