

HygoClean refuse sacks, 700+300*1250mm, 240l, black made of LDPE, 10 pieces, on roll, approx. 80my

Material info: LDPE refuse sacks

The abbreviation LDPE stands for low density polyethylene. LDPE is therefore a form of polyethylene (PE). PE is very elastic and insensitive to acids, alkalis, alcohols, oils and water - an excellent material for bin liners or refuse sacks. Low density PE (LDPE) is much softer and more flexible, but also less resilient than high density PE (HDPE). Due to the higher strength properties, HDPE films can be produced up to approx. 5 my, LDPE films are usually not thinner than 12 my.

- Low Density Polyethylene Film
- firm quality, soft-elastic
- extremely tough and tear-resistant

item number

WL49832

model

HygoClean-32333

Products for the electronic industry

manufacturer	FRANZ MENSCH
manufacturer item number	32333
length	1250 mm
width	1000 mm
order unit	1 PU
content unit	10 piece
colour manufacturer	black
Colour	black
content in liter	240 l
material	Low Density Polyethylen (LDPE)
film thickness	80 my
