

HygoClean waste bags, 160l, black, 80my, high quality 90x120cm, LDPE, 20 pieces

Material info: LDPE refuse sacks

The abbreviation LDPE stands for low density polyethylene. LDPE is therefore a form of polyethylene (PE). PE is very elastic and insensitive to acids, alkalis, alcohols, oils and water - an excellent material for bin liners or refuse sacks. Low density PE (LDPE) is much softer and more flexible, but also less resilient than high density PE (HDPE). Due to the higher strength properties, HDPE films can be produced up to approx. 5 my, LDPE films are usually not thinner than 12 my.

- Low Density Polyethylene Film
- above average thickness and strength, soft-elastic
- extremely tough and tear-resistant, puncture-proof and liquid-tight

item number

WL49835

model

HygoClean-32443

Products for the electronic industry

manufacturer	FRANZ MENSCH
manufacturer item number	32443
length	1200 mm
width	900 mm
order unit	1 PU
content unit	20 piece
colour manufacturer	black
Colour	black
content in liter	160 l
material	Low Density Polyethylen (LDPE)
film thickness	80 my
