

HygoClean refuse sacks LIGHT, 700*1100mm, 120I, blue made of LDPE, 25 pieces, on roll, approx. 40my

Material info: LDPE refuse sacks

The abbreviation LDPE stands for low density polyethylene. LDPE is therefore a form of polyethylene (PE). PE is very elastic and insensitive to acids, alkalis, alcohols, oils and water - an excellent material for bin liners or refuse sacks. Low density PE (LDPE) is much softer and more flexible, but also less resilient than high density PE (HDPE). Due to the higher strength properties, HDPE films can be produced up to approx. 5 my, LDPE films are usually not thinner than 12 my.

- · Low Density Polyethylene Film
- light quality, soft-elastic
- · extremely tough and tear-resistant

item number

WL49842

Products for the electronic industry

model	HygoClean-32556
model line	Hygoclean Light
manufacturer	FRANZ MENSCH
manufacturer item number	32556
length	1100 mm
width	700 mm
order unit	1 PU
content unit	25 piece
colour manufacturer	blue
Colour	blue
content in liter	120
material	Low Density Polyethylen (LDPE)
film thickness	40 my
