

Hygostar fine knitted glove ERGOFLEX MIKRO black nitrile micro foam coating, red, size S

Working gloves Ergoflex Mikro by Hygostar: The working gloves are made of nylon fine-knit and have a nitrile micro-foam coating on the palm and fingertips. The coating gives the glove a special grip technology with anti-slip effect and thus ensures excellent grip even on wet, greasy or oily objects. The Ergoflex Mikro work gloves are therefore suitable for construction, assembly, industry and automotive.

- highly elastic, breathable, seamless nylon fine knit
- palm and fingertips with nitrile microfoam coating
- perfect fit, pleasant wearing comfort, extra long knitted cuff
- special grip technology with anti-slip effect: coating has a suction effect like a sponge = very high dry/wet and oil grip
