

Hygostar cut protection glove CUT DOUBLE DIPPED black double nitrile coating, grey, size XL

Cut Double Dipped cut protection gloves from Hygostar: The cut protection glove has a special fibre with a 3/4 nitrile coating. Due to the sanded nitrile coating on the palm and fingertips a long service life can be guaranteed. The glove offers a very good grip especially with oils and fats. In addition, it has an increased protection against liquids and a high abrasion resistance. Thanks to the cut protection class 5, the glove can also be used when working with very sharp objects.

- elastic, breathable, seamless special fibre
- 3/4 nitrile coating
- palm and fingertips additionally with sanded nitrile coating
- increased liquid protection, very good grip especially with oils/greases
- excellent abrasion resistance, long service life
- highest cut protection class 5
