6cmx5m elastic, skin-friendly and breathable

ELASTIC emergency bandage This classic emergency bandage is made of particularly stretchy fabric. The advantage: the plaster follows every movement and protects the wound for a long time. The elastic bandage also holds reliably in places where there is a lot of movement, such as fingers or joints. No slipping or peeling off. The emergency bandage is rolled up on a 5m roll and can be cut to size individually. This way you only use the amount of plaster that is really necessary to cover the wound. The wound dressing is available in two different widths: 8 cm wide or 6 cm wide. skin-coloured textile fabric particularly elastic for an extremely good hold skin-friendly material breathable for a pleasant wearing sensation universally applicable ideal for your first aid equipment can be cut to size individually in the dispenser box for clean storage and easy removal

- made of elastic skin-coloured textile fabric
