

Hygostar fire blanket Fire Protect, 100x100cm, glass fibre white, in nylon bags

Fire blanket - especially for the kitchen:

Especially in the kitchen, where hot fat is used, a fire blanket is mandatory. And in an emergency, it is the only effective means against a grease fire. The blanket extinguishes by smothering the flames.

Fire blanket 1 x 1m: ideal for the household. For example when you need to extinguish small kitchen appliances or a burning pan.

To comply with EN 1869: 21 for fire blankets, order the matching steel FIRE PROTECT fire blanket container (Art. No. 8898) with it.

Fire blankets according to EN 1869: Fire blankets are ideal for extinguishing fat fires and are therefore a must in every professional kitchen, and are also required by law for the commercial sector. You should be aware of these important key data on the fire blanket standard 1869:

a fire blanket must be rectangular or square is a disposable product and cannot be reused

must have 2 grip pockets the shortest side must be at least .9 m long, the longest side must not be larger than 1.8 m must be stored in a fixed container (e.g. fire blanket container FIRE PROTECT Art. 8898) the container must be labelled with the word "Löschdecke" (fire blanket)
