

Hygostar Catchball "Infobord", 50cm, white

catch-ball system INFOBORD:

The Catch-Ball System is an innovative product and in comparison to pinboard, magnetic board, tape and Co. much easier and cleaner. With a single movement you can quickly and safely slide your notes under the board. For planning and organising drawings, plans, posters, large photos, notes and paper. The bar holds up to 10 sheets (one above the other) of normal DIN A4 paper. The secret: the balls made of special technical glass run freely in the rails and hold the paper firmly in place due to gravity. The rails can be arranged in any order. The receipt rail is made of anodised (scratch-resistant) aluminium and is available in white or silver. Available in different lengths and colours.

item number	WL50238
model	Hygostar-636604
manufacturer	FRANZ MENSCH
manufacturer item number	636604
order unit	1 PU
content unit	40 piece
Colour	white
