

Hygostar universal safety glasses, lens clear polycarbonate, transparent, temples black

The lenses of the safety glasses KLAR are made of smoke-coloured polycarbonate. The temple is extremely flexible and has a double design. The front part is made of polycarbonate, the back part of softer TPE. These safety goggles are very comfortable to wear because they are very light. It also has a soft nose bridge and the lenses fit nicely. The integrated shock absorber offers additional protection. The safety glasses Clear lets 92% of the light through and absorbs 99.9% of the UV rays up to 385 nm. It is particularly suitable for indoor use as protection against common, known dangers. It also ensures good colour recognition

- Plastic with polycarbonate lenses
- Light transmission: 92%, excellent field of vision
- absorbs > 99.9% of UV rays up to 385 nm, very good colour recognition
- temples extremely flexible, soft nose bridge, very light and comfortable
