

Hygostar detectable touch pen for monitors, blue housing, HACCP compliant

This detectable pen is ideal for working on monitors that operate by touch - so-called touch screens. The stylus allows you to operate the buttons on the monitor easily and with great precision - for speedy work. Another advantage: the touch pen is detectable. This makes it ideal for all food production processes, as it can be detected by metal detectors. This reliably prevents contamination of the food. detectable plastic, blue very stable with clip for quick and secure attachment, e.g. to clothing, in the inside pocket or on a clipboard small hole enables attachment to a belt or tag square shape prevents rolling away HACCP and BRC compliant extra narrow tip for precise and fast working on the monitor

- Detectable plastic housing
- only suitable for monitors
- with clip
- square shape, prevents rolling away
