

Hygostar detectable cable tie, blue 200x3,6mm

A cable tie can be used to quickly close a wide variety of containers or fasten things. Cable ties are very easy to use and are particularly reliable, and there are special detectable cable ties for use in the food industry. They can be detected by metal detectors if they get lost in production. the detectable cable ties are made of a plastic that is 1% detectable. different sizes and lengths available internally toothed particularly tensile strength HACCP-compliant perfect for quickly closing bags and transport containers ideal for installing cables and lines

- detectable plastic
- internally toothed
- tensile strength
