

Hygostar anti-slip overshoe, latex, white, size M (37-40)

The non-slip professional overshoes made of natural latex offer absolute safety on wet and oily surfaces. And they have to be. Because one thing is clear: especially in everyday working life, it is called Safety First. The anti-slip overshoes are very stretchy and can be worn over almost all types of shoes without any problems. Even the budget conscious will get their money's worth with this latex anti-slip professional overshoe. The overshoes are reusable and washable. This is especially worthwhile from an economic point of view. The outsole leaves no streaks on light-coloured floors - for 100% cleanliness in your business. Furthermore, the anti-slip overshoes are tested according to EN ISO 13287 SRA+SRB=SRC, autoclavable, i.e. sterilizable, and waterproof. The latex anti-slip professional overshoes are packed in a textile transport bag and available in four sizes: S = 34-36 M = 37-40 L = 41-44 XL = from 44
